

## EP Capital Press Release – 30 September 2011

**EP Capital is delighted to announce a personal investment by Bruno Deschamps in UK-based Solus Scientific, which develops and distributes new rapid detection methods for foodborne pathogens such as Salmonella, Listeria, E. Coli and Campylobacter using innovative immuno assays.**

Solus Scientific Solutions Ltd was founded in June 2009 to **commercialise novel intellectual property in microbiological testing developed by Professor Bill Stimson at the University of Strathclyde (Glasgow)**. In 2010, Solus joined forces with **RayAI Ltd**, an established player in the market founded in December 2002, and a **merger was completed in June 2011**, with RayAI now a wholly owned subsidiary of Solus Scientific.

Bruno Deschamps is delighted to join the **Board as a Non Executive Director** and assist **Douglas Dundonald** (Executive Chairman), **Ray Wakefield** (Chief Executive) and the rest of the team in the development of Solus Scientific.

More information on the innovative solutions developed by Solus Scientific can be found on the Company's [website](#).
